COAL PRODUCTION UP; DEPARAFFINING INSTALLATION ADDED

COAL PRODUCTION IN VALEA JIUUI BASIN ABOVE QUOTA -- Viata Sindicala, No 441,  
18 Feb 49

At the beginning of February, the crew of Ludovic Pop in the Petrosani mine had started on its March production quota. By rationalization of work and by the inspiration of examples set by other workers under the 1949 Economic Plan, the crew members have averaged a daily production of 150 percent above their quota. On 18 February, the production quota for March had been achieved and work started on the April quota. Many other crews of the Valea Jiului coal basin have registered daily production of 20 to 50 percent above quota.

Ilie Palotai's crew, working in Sector 2 of the Pisu-Aminoasa mines in the Valea Jiului, surpassed its production quota by 755 percent on 13 February.

PRODUCTION UP AT BAIU NOUA COAL MINES -- Libertatea, No 1359, 23 Feb 49

Two crews under Nicolae Benga and Adolf Schramak surpassed their production quotas in the coal mines of Baia Noua, Severin Judet. The crews extracted 18,600 kilograms of coal in place of the norm of 4,860 kilograms. No time is given to show to what period the norm referred. These crews were working in the second shift on level No 65.

The new director of these mines is Ion Rubas, who has already distinguished himself by his production records at the Petrila coal mines. He introduced the methods used at Petrila and through their use has been able to increase the production at Baia Noua.

**JANUARY COAL-PRODUCTION QUOTAS FULFILLED --** Vieta Sindicals, No 446, 26 Feb 49

The 14 workings of the Coal Administration have either achieved or surpassed their January production quotas. Percentages of fulfillment of production quotas
